# FNFA POOLED INVESTMENTS

**GET YOUR MONEY WORKING FOR YOU TODAY!**

## OPTIONS

The FNFA's Pooled Investment Fund Program will get your money working for you. FNFA's Pooled Investment Funds earn attractive interest rates, are easy to use, and easy to access.

First Nation governments investing with the FNFA can be sure that their money is safe, secure, professionally managed, and growing!

The FNFA understands that each community is different and has different investment needs. That's why the FNFA's Pooled Investment Funds offer several investment options.

## THE INVESTMENT POOLS

### The Money Market Fund (Short-term)

The Money Market Fund is designed to provide First Nations with high quality money market instruments with maturities of 366 days or less. The Money Market Fund is valued at the close of business every day, which means you can take your money out with only 24 hours notice, without penalty. This fund represents an excellent short-term investment opportunity for First Nations.

### Intermediate Fund (Medium-term)

The principal objective of the Intermediate Fund is to obtain investment income and through prudent and active professional management of its assets achieve moderate capital appreciation. The Intermediate Fund is valued at the close of business every Wednesday and on the last business day of each month, which means you have access to your money every week without penalty. First Nations can use the Intermediate Fund for their short to medium-term investment needs. Users of this type of fund usually leave their monies invested for at least a year to maximize earnings.

### The Bond Fund (Long-term)

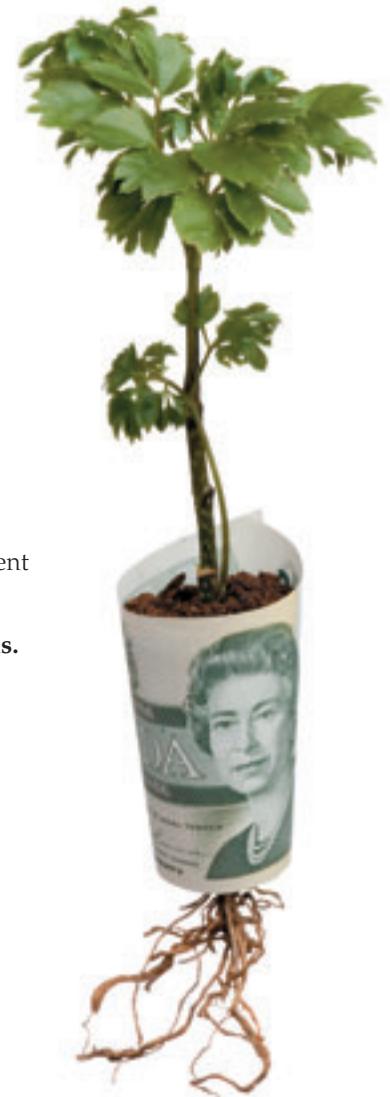

In June 2010 the FNFA began offering First Nations access to the Bond Fund. The Bond Fund is very similar to the Intermediate Fund, but has consistently outperformed both of the FNFA's other investment funds. The Bond Fund is valued at the close of business each Wednesday and on the last day of every month, which means you have access to your money on a weekly basis. This investment option represents an excellent long-term solution for First Nations. Users of the Bond Fund typically keep their monies invested for 2 or more years to maximize earnings.

## BENEFITS

**The FNFA's Pooled Investment Funds offer First Nations many advantages:**

- The FNFA is owned and governed by its member First Nations
